DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II, claims 1-17 in Paper No. 4 is acknowledged.

2. Further restriction is required as follows:

This application contains claims directed to the following patentably distinct species of the claimed invention: 1st species including implanting the semiconductor substrate though the first insulating layer with a first species to form a first doped region within the semiconductor substrate and forming a first contact electrically connected to the first doped region, 2nd species including forming a second insulator layer adjacent to the active layer and on the first insulator, forming a doped region within the substrate before forming the gate electrode and forming a first opening in the second insulator layer and the first insulator layer, and 3rd species including removing a portion of the active layer, forming a second insulator layer adjacent to the active layer and on the first insulator layer, forming an opening in the second insulator layer and the first insulator layer and forming a doped region within the substrate under the area of the opening before forming a conductive material within the opening.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suk-San Foong whose telephone number is 703-305-0383. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on 703-308-4918. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7722 (7724, 3431, 3432).
